PROFESSIONAL SUMMARY

Aspiring technology professional with a strong foundation in software development, data-driven problem solving, and cross-domain adaptability. Adept at quickly learning emerging technologies, collaborating in diverse teams, and applying analytical thinking to deliver practical solutions. Passionate about bridging AI, cloud, and big data to build innovative systems that enhance efficiency and user experience.

EDUCATION

Vellore Institute of Technology <i>B.Tech in Information Technology, CGPA: 9.08</i>	Vellore, Tamil Nadu 2022 – Present
FIITJEE Junior College <i>Telangana State Board of Intermediate Education, 96.8%</i>	Hyderabad, Telangana 2020 – 2022
Meridian School <i>CBSE, 10th Board Exams, 93.6%</i>	Hyderabad, Telangana 2019 – 2020

EXPERIENCE

Intern Schneider Electric, Bangalore, India	May 2025 – June 2025
- Integrated a third-party software solution across Schneider's largest PCBA facility, improving product quality by 20% and reducing component wastage by 15%. - Facilitated collaboration between digital and manufacturing teams, accelerating deployment timelines by 30%. - Digitized key operational checksheets using Augmentir; deployed 3 checksheets live, increasing inspection efficiency by 25%.	
AI/ML Intern (Machine Learning Intern) FinMitr	Aug 2024 – Nov 2024
- Built a generative AI chatbot to provide personalized financial services, handling over 1,000 unique queries. - Engineered an NLP framework that reduced average response times by 40% and improved query resolution rates. - Enhanced customer support scalability by automating query handling, freeing human agents for complex cases.	

PROJECTS

Deceptive Website Design Analysis Big Data, Apache Spark, Scikit-learn, NLP	Mar 2025 – Apr 2025
- Developed a scalable big data system to detect dark patterns in e-commerce websites across 10,000+ reviews. - Applied NLP to identify urgency cues and deceptive tactics with 85% classification accuracy. - Boosted model performance by integrating engineered behavioral features into Spark pipelines.	
AI-Driven Sleep Analysis Python, Librosa, Scikit-learn, Streamlit [Live Demo]	Jan 2025 – Mar 2025
- Implemented an ML pipeline using audio feature extraction (MFCC) to detect sleep anomalies with 85% accuracy. - Merged structured health data with audio signals to improve prediction robustness. - Deployed via Streamlit, enabling real-time predictions and delivering personalized sleep recommendations.	
Tech Store Website AWS, Python, Flask, DynamoDB, S3, Lambda	Sep 2024 – Oct 2024
- Designed and deployed a cloud-native e-commerce platform optimized for scalability and high availability. - Reduced platform latency by 30% through AWS Lambda integration with API Gateway and DynamoDB. - Enabled real-time customer notifications via AWS SNS and hosted static assets on S3, improving user engagement.	

SKILLS

Programming Languages: Java, Python, C, C++, SQL, JavaScript, HTML, CSS
Machine Learning & AI: Supervised & Unsupervised Learning, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Scikit-learn, TensorFlow, PyTorch, Hugging Face, Librosa
Data Science & Analytics: NumPy, Pandas, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering, Model Deployment
Big Data & Cloud: Apache Spark, Hadoop, AWS (S3, DynamoDB, Lambda, API Gateway, SNS), Cloud-Native Application Development
Frameworks & Development: Flask, Streamlit, React.js, Node.js, RESTful APIs, Microservices Architecture
Databases: MySQL, MongoDB, DynamoDB
Developer Tools: Git, GitHub, Docker (Basics), Postman, VS Code, Jupyter Notebook
Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Artificial Intelligence (AI), Machine Learning (ML), Web Development, Database Management Systems (DBMS), Computer Networks (CN), Operating Systems (OS), Big Data Analytics
